VARITEX

Revolutionizing Trash Can Management

No Scheduling - No Guessing

The Varitex trash can management platform is a LoRaWAN solution optimized to monitor waste containers. When a waste bin is full or nearing full, the Varitex server will alert the appropriate contacts of its status via email and/or text message. Also available is our **WasteIQ** system for dog waste station management.

Make Facilities Appealing - Not Appalling

No longer does sanitation crews need to travel from trash can to trash can to inspect and empty them! Varitex optimizes maintenance of your public trash containers. People in HOA communities, apartment rental complexes, parks, schools, airports, and all other facilities will no longer be offended and inconvenienced by full or overflowing trash bins.
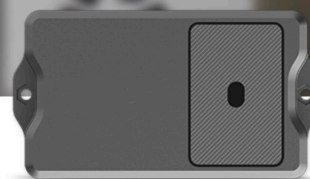

ToF Laser Distance Sensor

Highly Specialized, Reliable and Durable

IP-67   LoRaWAN®

- *Typically 5-10 Year Battery Life*
- *Lifetime Warranty*
- *Long Range Up To 1 Mile Urban & 9 Miles Rural*
