

Revolutionizing Dog Waste Station Management

No Scheduling - No Guessing

WasteIQ™ is a LoRaWAN solution optimized to monitor Dog Waste Stations. When a station's waste deposit bag is full or nearing full, the Varitex server will alert the appropriate contacts of its status via email and/or text message. Also available is our **Trash Can Sensor** for public waste bin management.

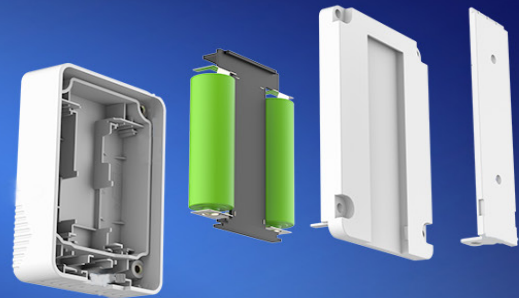

Make Outdoors Appealing - Not Appalling

No longer does a person need to travel from station-to-station to inspect and empty the doggy-doo deposit bags! WasteIQ optimizes maintenance of the dog waste stations to the benefit of dog lovers and non-dog owners alike. Residents of HOA communities, apartment rental complexes and those enjoying parks and nature trails are no longer offended and inconvenienced by unsanitary, overflowing dog waste containers.

Cloud Control & Superior Design

- Typically 5 Year Battery Life
- IP67 Weatherproof Enclosure
- Long Range Up To 1 Mile Urban & 9 Miles Rural
- Annual Subscription Includes Cellular Server Connection and Lifetime Warranty
- Full Featured Cloud Dashboard

Why Guess When Bags Are Full?

- Receive Alerts When Full or Overflowing
- Monitor Percentage of Full Level
- See the status of all stations using your Cloud Dashboard or Phone App

Save Money + Bag Auto-Ordering

- Fewer trips saves manpower and fuel for vehicles
- Visit and empty only the stations that need it
- Don't remove & replace partially full bags
- Optional cloud management of bag supply levels & automatic ordering more bags when running low

Ease of Use

Patent Pending Process - Once installed and setup, adjustments to the full can threshold may be done at each station without a phone or computer!
